SCIENTIFIC DENTISTRY AT MODERATE

Our extracting room is in charge of an expert who has made this work a specialty for years:

We use more gas than any firm in America, guaranteeing it to be chemically pure and the best that money or science can procure. With such an agent there is positively no danger, but for those who profer a local ansesthetic we use cocaine and zonine (the latter our own invention), applied to the guass hypodermically. In short, we are prepared to administer any known ansesthetic and to extract your teeth SEILLFULLY as well as PAINLESSLY. Compare the price of our 24K.
